Extreme Planets: For all ages, humanity has wondered whether we are alone in the Universe. Fifteen years ago we were unaware of planets outside our solar system, but today these “extrasolar” planets appear to be quite common. As the search continues, the possibility exists that one day we might find life elsewhere in the Universe, born in the light of another sun. Join us in the adventure as we explore Extreme Planets.

Secret of the Cardboard Rocket: (This show is great for children!) Join two children, Bonnie and Marcus, on a magical journey through the Solar System, aided by a talking astronomy book, a cardboard rocket, and a vivid imagination. Take an up close look at all of our planets and learn the secret that makes this entire journey possible.

Two Small Pieces of Glass: Follow two students as they interact with an astronomer. Along the way the students learn how telescopes work, the history of telescopes, and major discoveries made by these instruments. (All ages)

IBEX: Search for the Edge of the Solar System
Follow the creation of NASA’s IBEX. Audiences will get an in-depth look at the mission and how IBEX is creating a map of our Solar System’s boundary.

Notice: Shows are subject to change. Admission and seating, for 110, is on the basis of first-come, first-served. Seating may not be available for all showings. Visitors **must be** seated before presentation begins. No entry after doors are closed, late arrivals may attend next presentation. Please, **NO** food or drinks allowed in Planetarium.
